HELLO.

Thank you for taking the time to review my application.

I am a software professional with a Computer Science background and more than 15 years of experience delivering technology solutions for enterprise clients, including Microsoft, Comcast/Xfinity, and AT&T. Throughout my career, I have built web and mobile applications, collaborated with distributed development teams, led technical initiatives, and helped organizations solve complex business challenges through technology.

My experience spans software development, technical project leadership, accessibility initiatives, stakeholder communication, and team collaboration. I am passionate about creating clean, maintainable solutions and translating complex requirements into practical outcomes that provide value to both users and organizations.

In addition to my technical background, my years as an educator strengthened my communication, mentoring, and problem-solving skills, allowing me to effectively bridge the gap between technical teams and business stakeholders.

I am seeking an opportunity where I can contribute as a developer while continuing to grow technically, collaborate with talented teams, and help build solutions that make a meaningful impact. I appreciate your consideration and look forward to discussing how my experience, technical skills, and leadership background can contribute to your organization.

Sincerely,
Natosha Caldwell
