

NATOSHA CALDWELL

FULL-STACK DEVELOPER | TECHNICAL MANAGER | PROBLEM SOLVER

EXECUTIVE SUMMARY

Full-stack developer with experience building web and mobile applications for enterprise clients including Microsoft, Comcast/Xfinity, and AT&T. Strong background in JavaScript, React, Python, SQL, and modern web technologies, combined with extensive experience leading technical teams and delivering software solutions at scale. Known for translating complex requirements into clean, maintainable solutions while collaborating effectively with stakeholders, designers, and developers.

WORK EXPERIENCE

IB Math Teacher (Grades 11-12, IB DP)

Hampton Preparatory | February 2015 - May 2025

- Designed and delivered rigorous IB-aligned curriculum for Higher Level and Standard Level mathematics courses.
- Developed mathematical modeling projects that connected abstract concepts to real-world applications and interdisciplinary learning.
- Created differentiated instructional strategies that improved student engagement across diverse learning styles and achievement levels.
- Guided students through complex investigations and internal assessments, strengthening critical thinking and independent research skills.

TOOLS AND TECHNICAL UNDERSTANDING

- Project Coordination & Planning
- Agile/Scrum Practices
- Cross-Functional Collaboration
- Requirements Gathering & Documentation
- Stakeholder Communication
- Risk & Issue Tracking
- Resource Scheduling
- Process Improvement
- Technical Understanding (Java, Spring, Python, JavaScript, SQL, HTML, CSS, Git, AWS, React, Next.js)
- Tools: Jira, GitHub, Docker, Figma, Photoshop, Linux

Technical Project Manager

Topcoder 2008 - 2022

- Coordinated large cross-functional development teams (100+ resources) supporting complex software initiatives
- Scoped project requirements, produced clear documentation, and aligned teams around milestones and deliverables
- Managed project budgets ranging from \$2K-\$2M, ensuring efficient resource allocation and on-target delivery
- Identified opportunities for account or service expansion, contributing to 15-20% revenue growth
- Supported enterprise clients by delivering technical onboarding and training for Salesforce, ServiceNow, and QA platforms
- Collaborated with architects and engineering leads to maintain project feasibility, technical alignment, and quality standards

Software Developer (Contract + Freelance)

Topcoder / Wipro (Remote) • May 2009 - June 2016

- Delivered software solutions for enterprise clients including Microsoft, Comcast/Xfinity, and AT&T across web and mobile platforms.
- Contributed to accessibility initiatives for Microsoft Office products, helping improve usability and compliance for diverse user populations.
- Collaborated with distributed teams of developers, designers, and QA analysts to deliver high-quality software solutions.
- Built responsive, accessible user interfaces using React, Angular, HTML5, CSS3, and JavaScript.
- Participated in code reviews, Agile ceremonies, and continuous integration workflows to maintain software quality and delivery timelines.

CORE STRENGTHS

- Leadership
- Communication
- Problem-solving
- Project/operations management
- Teaching and mentoring

University of Texas at Arlington

BS in Information Systems

Served as Secretary of Society of Women in Engineering

NATOSHA CALDWELL

WEB DESIGNER | UI/UX DESIGNER | WORDPRESS DEVELOPER

EXECUTIVE SUMMARY

Creative web designer and developer with experience designing, building, and maintaining websites for businesses across a variety of industries. Skilled in WordPress, Figma, Adobe Creative Suite, responsive web design, user experience, and front-end development. Combines technical expertise with strong communication and project management skills to deliver websites and digital experiences that are visually engaging, user-friendly, and aligned with business goals. Experienced collaborating with clients, content creators, marketers, and developers throughout the design and implementation process.

TECHNICAL UNDERSTANDING

DESIGN & UX: Figma • Adobe Illustrator • Photoshop • Wireframing • User Experience (UX) • User Interface Design (UI) • Responsive Design • Website Design • Accessibility Best Practices • Design Systems

WORDPRESS & CMS: WordPress • Divi • Elementor • Advanced Custom Fields (ACF) • Website Maintenance • Content Management • Landing Pages

WEB DEVELOPMENT: HTML5 • CSS3 • JavaScript • React • Next.js • Responsive Development • Cross-Browser Compatibility

MARKETING & COLLABORATION: Email Design • Content Strategy Collaboration • Client Communication • Project Management • Stakeholder Management • Agile/Scrum • SEO Collaboration

TOOLS: Figma • GitHub • Jira • Docker • Photoshop • Illustrator

CORE STRENGTHS

UI/UX Design • Client Communication • Creative Problem-Solving • Project Management • Website Design • Content Strategy Collaboration • Teaching & Mentoring

WORK EXPERIENCE

Technical Project Manager

Topcoder 2008 - 2022

- Designed, developed, tested, and maintained enterprise web applications for Microsoft, Comcast/Xfinity, AT&T, and other large-scale clients.
- Built responsive front-end interfaces using React, Angular, JavaScript, HTML5, CSS3, and modern web development practices.
- Developed reusable components, integrated APIs, and collaborated on scalable application architectures.
- Worked within Agile/Scrum environments, participating in sprint planning, backlog refinement, code reviews, and release activities.
- Utilized Git version control, branching strategies, and collaborative development workflows within distributed teams.
- Performed software testing, defect resolution, and quality assurance activities to ensure reliable application performance.

Web Designer and Developer (Contract + Freelance)

Topcoder / Wipro (Remote) • May 2009 – June 2016

- Designed and developed responsive websites and web applications for enterprise and commercial clients.
- Created user-centered interfaces focused on usability, accessibility, and responsive design principles.
- Built and maintained WordPress websites, landing pages, and content-driven web solutions.
- Produced wireframes, mockups, and design recommendations to improve user engagement and user experience.
- Performed usability testing, QA validation, and iterative design improvements.
- Worked closely with development teams to ensure accurate implementation of approved designs.

IB Math Teacher (Grades 11-12, IB DP)

Hampton Preparatory • February 2015 – June 2025

- Designed and delivered rigorous IB-aligned curriculum for Higher Level and Standard Level mathematics courses.
- Developed mathematical modeling projects that connected abstract concepts to real-world applications and interdisciplinary learning.
- Created differentiated instructional strategies that improved student engagement across diverse learning styles and achievement levels.
- Guided students through complex investigations and internal assessments, strengthening critical thinking and independent research skills.

Dear Hiring Manager,

I am excited to apply for the Full Stack WordPress Developer position with Edgewater Federal Solutions. I bring extensive experience developing enterprise web applications, building responsive front-end experiences, and supporting back-end systems using modern web technologies.

Throughout my career, I have developed custom WordPress solutions, including themes, plugins, and Gutenberg-based components, while working with JavaScript, React, PHP, SQL, Git, cloud platforms, and Agile development practices. I have delivered solutions for enterprise clients including Microsoft, Comcast/Xfinity, and AT&T, with experience spanning full-stack development, software testing, DevOps workflows, CI/CD processes, and collaborative software delivery.

In addition to my technical background, I have led cross-functional teams, translated business requirements into scalable solutions, and consistently delivered high-quality software in fast-paced environments. I enjoy solving complex problems and building applications that balance user needs, business objectives, and technical excellence.

Thank you for your time and consideration. I look forward to discussing how my experience can contribute to your team.

Sincerely,
Natosha Caldwell

Dear Hiring Team,

I am excited to apply for the AI Workflow and Automation Architect position with your company.

What drew me to this role is that it sits at the intersection of the two areas where I have spent most of my career: technology and education.

I earned a degree in Computer Information Systems and have spent years working in software development, technical project management, and solutions engineering. At the same time, I spent a number of years teaching mathematics, most recently in the IB Diploma Programme. Because of that background, I understand both the technical side of building solutions and the practical realities of creating content and experiences that help students learn.

Throughout my career, I have been the person who enjoys taking something complicated and making it understandable, organized, and actionable. Whether that meant leading technical teams, coordinating large projects, documenting processes, or teaching advanced mathematics, the goal was always the same: help people get from where they are to where they need to be.

The rapid growth of AI creates incredible opportunities in education, but only if the technology is implemented thoughtfully. What excites me about this role is the chance to help shape workflows, improve content quality, and build systems that make educators' jobs easier while creating better learning experiences for students.

I am a naturally curious person who enjoys learning new technologies, asking questions, and finding better ways to do things. I believe my combination of technical experience, project leadership, and classroom experience gives me a perspective that is particularly well-suited for Imagine Learning's mission.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,
Natosha Caldwell
